

## School of Materials Science & Engineering

January 1, 2024

Prof. Shiyu Zheng  
School of Materials and Chemistry  
University of Shanghai for Science and Technology  
516 Jungong Road, Shanghai 200093, China

**Dear Professor Zheng,**

With this letter, I would like to formally invite you to join my research group and conduct collaboration research in the School of Materials Science and Engineering at Nanyang Technological University, Singapore. I value your strong expertise in solid-state battery that will greatly help us clarify the mechanism of electrolytes and batteries. As a visiting professor, you will be involved in studying structural measurements using the advanced techniques such as Transmission Electron microscopy (TEM), Focused ion beam (FIB), conducting in-situ and ex-situ measurements of battery materials, and writing scientific articles based on your research during your stay from January 18, 2024 to February 26, 2024. Our joint program aims to develop high-performance solid electrolytes and batteries.

This invitation is not an offer of employment. You will not receive any salary from the University; this letter does not create an employer-employee relationship between you and the University. Furthermore, your airfare and accommodation will be covered by yourself or your University. We expect your arrival by January 18, 2024.

Should you need further information from me, feel free to let me know.

Sincerely yours,

Yizhong Huang (Ph.D)  
Associate Professor  
School of Materials Science and Engineering  
Nanyang Technological University
